www.harriscountywcid36.com

"A Recognized SUPERIOR WATER DISTRICT and a 'WATER SMART' Participant"

****FEES ARE SUBJECT TO CHANGE. VERIFY WITH OFFICE BEFORE PROCESSING PAYMENTS****

1. Call **CENTERPOINT (MAP DEPARTMENT)** at **713-207-4460** to get the physical address for the property
2. Come to the water office with the address and a copy of your deed of trust for your property. **You must bring both pieces of information or we cannot process your taps.**
3. Purchase your sewer and water taps, inspection, permit, and water deposit. You will have to make a drawing of your lot and home placement, also.
4. Stakes must be placed **nine (9) feet** apart from each other.
 - Stakes must be labeled with **ADDRESS** and **"WATER"** or **"SEWER"** or it may cause a delay in your scheduling.
 - Do not place a meter or cleanout where a driveway may be located.
 - **Do not fence in a meter or cleanout.** It must be accessible to the District at all times.
5. Sewer line must be **four (4) inch SCH 40 PVC**. There should be no angles **greater than 45 degrees**. Try not to make a bend with your sewer line, but if you have to make a turn in your sewer line do the following...

DO NOT DO THIS

DO THIS

6. **After you have laid your sewer line and connected to our tap then you must leave your sewer line uncovered until you have contacted the office at the number listed below.**
CALL THE WATER OFFICE FOR AN INSPECTION 713.453.5493 please allow 3 days for inspections.
7. If your inspection fails for whatever reason then you must pay an additional \$50.00 for a re-inspection each time we inspect your sewer line.
8. Do not tamper with the District's installed meter and cleanout. Any damages will be charged to the customer.
9. The sanitary sewer lateral shall have a minimum grade of ¼ inch per foot (1.25" per 10') from the main to the right of way or easement. The sanitary sewer lateral shall have a minimum grade of 1/8 inch per foot and a maximum grade of ¾ inch per foot (7.5" per 10') from the building to the right of way or easement. Laterals shall not be connected to the main at an angle greater than 45° from the horizontal.
 - A. No direct connection between the public drinking water supply and a potential source of contamination exists. Potential sources of contamination are isolated from the public water system by an air gap or an appropriate back flow prevention assembly in accordance with Commission regulations.
 - B. No cross-connection between the public drinking water supply and a private water system exists. Where an actual air gap is not maintained between the public water supply and a private water supply, an approved reduced pressure-zone backflow prevention assembly is properly installed and a service agreement exists for annual inspection and testing by a certified backflow prevention assembly tester.
 - C. No connection exists which would allow the return of water used for condensing, cooling or industrial processes back to the public water supply.
 - D. No pipe or pipe fitting which contains more than 8.0% lead exists in private water distribution facilities installed on or after July 1, 1988.
 - E. No solder or flux, which contains more than 0.2% lead, exists in private water distribution facilities installed on or after July 1, 1988.
 - F. Must have hose bib vacuum breakers on all outside faucets.

****Inspections are priced at a one hour minimum, per trip. Additional time will be charged per hour.**
****Inspections expire within a 12 month period from date of purchase. Inspections not completed by 12 months will have to pay for inspections again.**
